addition to Section 14.2.

Other Observations:

- Water supply is obtained from drilling then undergoes different water purification procedures (water filtration, carbonization, UV light, etc.) before it is used in everyday operations.
- Cleaning of the facility is done every after 28 days (when there are no poultry in the facility) and lasts for about 3 days. During the 3 days cleaning of the facility, approximately 4000L of water is consumed.
- The facility has a septic tank for the wastewater, but during the cleaning process, wastewater flow volume is large thus it flows into a 4-chamber wastewater treatment facility located approximately 2 meters from the septic tank. The chlorination process is done in the 1st chamber.

Figure 1. Septic tank at the back of the facility

Figure 2. Another WTF meters away from the septic tank

- A generator set is observed in the premises.
- No ECC billboard is observed in the facility.
- The 40,000 heads poultry was put in last September 24, 2021, and is under contract with Chicken Essentials Ph Inc.
- The establishment is operating without a valid Discharge Permit (DP).

Remarks and Recommendation:

- ✓ To advise the proponent to install an ECC billboard.
- ✓ For issuance of Notice of Violation for operating without a valid Discharge Permit which is in violation of Sec. 27 Par. C of RA9275 "The Philippine Clean Water Act of 2004".
