Other Observations:

- Permit to Operate Air is valid until December 5, 2022 for the 2 units concrete batching plants, 1 unit asphalt batching plant and one unit 176 KW Denyo diesel engine standby generator set.
- Concrete batching plant no. 2 was already decommissioned and was not observed in project site.
- The asphalt batching plant was not operational during the time of monitoring, on-going maintenance activities were conducted. Last operation of the asphalt batching plant was on March 14, 2022.

- According to Ms. Cobacha, emission testing of asphalt plant was conducted in the 4th quarter 2021. Results were not yet submitted to this Office.
- Concrete batching plant 1 was operational.

• Generated hazardous wastes (used oil and used batteries) are stored in HWSA. Storage facility is not provided with appropriate flooring and bund wall.

- Discharge Permit is valid until May 21, 2022.
- An improved motorpool area was observed within project site.

- SMR is submitted quarterly through the online system.
- A six-storey office building was observed on-site. Such is issued with Certificate of Non-Coverage.

Remarks and Recommendation:

- ✓ Submit emission test report to this Office upon availability. Include emission test results in quarterly submission of SMR.
- ✓ Improve HWSA, provide appropriate flooring and bund wall to prevent leaks and spills outside the HWSA.
- ✓ Renew POA and DP through the online system, 30 days prior expiration. Include regular emission testing of asphalt plant as POA condition if applicable, per emission estimate computation.
- √ Provide oil-water separator at motorpool area.
