Other Observations:

- The gas station was operational during the time of inspection.
- Based on the issued Permit to Operate, air pollution source equipment provided in the gas station are four (4) UGTs each having 15kL capacities (for diesel and gasoline), one (1) Gasoline UGT having a 7.5 kL capacity and one (1) 25 KVA Airman generator set. This PTO is valid until July 22, 2025.
- · Submission of Self-Monitoring Report (SMR) online is regular and timely.
- PCO for the gas station is accredited until March 10, 2024.
- All Modules of the submitted SMR online, covering 4th quarter 2021, has been properly supplied with the necessary data and information. Module 4 intended for R.A. 8749, has been supplied with the air pollution sources in the gas

station, its operating hours for the entire quarter, and the fuel consumption for the standby generator set. SMR was received as sufficient.

Remarks and Recommendation:

 The gas station complies with the permitting and compliance requirements of R.A. 8749 including P.D. 1586, and R.A. 9275 based on online and physical documents' evaluation.
